### FOOTPRINTS

The newborn screening test (PKU) is capable of screening for more than 50 disorders, yet most states screen for less than 8. It tests babies for serious disorders and should be performed when your baby is 24-48 hours old.

To find out what your state's routine newborn screening test detects and to learn more, go to [www.savebabies.org](http://www.savebabies.org) or call toll-free 1-888-454-3383.
